

VISHAL KUMAR

Technical Support Engineer | AI Automation Specialist | Data Analytics
+91 8307867610 · vishaljha4u88@gmail.com · Bengaluru, Karnataka · LinkedIn

PROFESSIONAL SUMMARY

Technical Support Engineer at HP Inc. with 3+ years and three promotions, delivering global PC and Print support across APAC, EMEA, and Americas markets. Built and shipped AI-powered tools — a Chrome Extension support copilot, an LLM-based call analysis assistant, and automated case-management bots — reducing manual effort by 70%+. Pursuing a Data Analytics certification (Python, SQL, Power BI, Tableau, Snowflake) with an ML churn model at 85% accuracy.

CORE COMPETENCIES

Technical Troubleshooting · Escalation & Incident Management · Root Cause Analysis · Remote Support · AI-Assisted Diagnostics · SaaS & Application Support · Process Automation · Hardware Diagnostics · Knowledge Management · Cross-functional Collaboration · Customer Experience (CX) · Data Analysis & Reporting

PROFESSIONAL EXPERIENCE

Customer Solution Center Rep 3 — Technical · HP Inc., Bengaluru

Mar 2025 – Present

- Resolved complex hardware, OS, and connectivity escalations across global enterprise markets, maintaining top-tier CSAT scores and SLA compliance.
- Deployed AI-assisted diagnostic workflows into live support operations, directly increasing Remote Resolution (RR) count and cutting average handle time.
- Engineered and launched multiple case-management automation bots — handling categorisation, status updates, and follow-up triggers — eliminating repetitive manual workload team-wide.
- Built a Team Feedback Aggregation Tool adopted by managers to consolidate, filter, and action customer feedback, strengthening QA and coaching cycles.
- Authored escalation playbooks and knowledge-base articles; mentored junior engineers to reduce repeat contact rates and improve first-contact resolution.

Customer Solution Center Rep 2 — Technical · HP Inc., Bengaluru

Oct 2023 – Feb 2025

- Promoted within 13 months; managed elevated technical cases covering Windows OS, Active Directory, Microsoft 365, hardware diagnostics, and VPN/network troubleshooting across APAC, EMEA, and Americas.
- Piloted AI summarisation tools during live support interactions, reducing triage time and accelerating solution identification for complex multi-system issues.
- Analysed escalation trends and parts usage data, surfacing early-warning insights shared with internal operations teams to improve parts efficiency and support planning.
- Maintained consistent performance across multiple regional markets with varying regulatory frameworks and product configurations.

Customer Solution Center Rep 1 — Technical · HP Inc., Bengaluru

Sep 2022 – Sep 2023

- Delivered end-to-end technical support for HP consumer and commercial PC and Print products via voice, chat, and ticketing channels across international markets.
- Built troubleshooting fundamentals across hardware diagnostics, OS configuration, and peripheral connectivity while consistently meeting SLA targets and CSAT benchmarks.
- Adapted rapidly to multi-market operations across global time zones, demonstrating agility across product lines and regional support requirements.

TECHNICAL SKILLS

Support Technologies: Remote Diagnostics, Hardware Troubleshooting, Escalation Management, Incident Management, Root Cause Analysis

Operating Systems: Windows 10/11, macOS

Networking & Security: TCP/IP, DNS, DHCP, VPN, Wi-Fi Diagnostics, Active Directory, Microsoft 365

CRM & Ticketing: ServiceNow, Salesforce, HP CRM Platforms

Data & Analytics: Python (Pandas, NumPy, Scikit-learn), SQL, Power BI, Tableau, Excel, EDA, ETL, Feature Engineering

AI & Automation: LLM Integration (Llama 3.1 / Ollama), Chrome Extensions (MV3), FastAPI, REST APIs, DOM Automation, Generative AI

Dev Tools: Git, GitHub, JavaScript, VS Code, Swagger UI

FEATURED PROJECTS

Copilot — AI Support Case Management Assistant · JavaScript · Chrome Extensions MV3 · REST APIs · DOM Automation

- Built a Chrome Extension AI copilot integrating HP enterprise platforms (CDAX, DSL, PartSurfer) into a unified real-time dashboard, cutting manual case review effort by 70%+.
- Automated extraction of case metadata, troubleshooting history, and support notes; generated issue summaries, recommended next actions, and assisted hardware dispatch decisions.
- Delivered predictive service insights, warranty data, and browser-native workflow automation using Chrome Extension APIs (Manifest V3) and dynamic DOM analysis.

SupportCopilot AI — Call Analysis & Documentation Assistant · *Python · FastAPI · Faster-Whisper · Ollama · Llama 3.1 · REST APIs*

- Designed an on-premise AI pipeline converting support call recordings into structured case documentation — local STT via Faster-Whisper, analysis via Llama 3.1 (Ollama).
- Built FastAPI REST endpoints with Swagger UI for audio upload, transcription, and LLM-powered case analysis; privacy-first architecture keeps all audio fully local.
- Automated post-call transcript generation and issue classification, reducing manual documentation effort and accelerating case closure.

Customer Churn Prediction Model · *Python · Pandas · Scikit-learn · Logistic Regression · Decision Trees*

- Built an end-to-end ML pipeline — data cleaning, feature engineering, class balancing, model training — achieving 85% accuracy on real-world customer behavioural data.
- Generated actionable retention strategy recommendations from model outputs, translating technical predictions into business-ready insights.

CERTIFICATIONS & LEARNING

Master Data Analysis · Python, SQL, Statistics, EDA, ETL, Power BI, Tableau, Excel, Feature Engineering, Generative AI, Snowflake, AWS · In Progress

EDUCATION

Bachelor of Computer Applications (BCA) · *University of Engineering and Management, Jaipur*

May 2022
